

LEXCA009 PLUVIOMETER

Accurate measure of the pluviométrie.

Compatible only with the LR-MS

DESCRIPTION

The rounded shaped rain gauge is compact and has a mounting location for plastic support.

It has a very good finish and is equipped with a cable of about 75 cm.

After each filling, the bucket empties automatically so that it can be ready to fill again. The bucket fills to about (0.4 mm) and causes a switch to temporarily close.

Once wired and added to the LR-MS, the rainfall value can be reported regularly using an LR-MB or LR-BST gateway or irrigation station on the application or the MySOLEM platform..

CHARACTERISTICS

OUTPUT SIGNAL	Dry contact
