CONNECTED URBAN SPACES

SUSTAINABLE IRRIGATION AUTOMATION

solem-irrigation.com

2025 EDITION

FREE APP & ONLINE PLATFORM

MANAGE YOUR IRRIGATION SYSTEM EASILY WITH OUR APP

User-friendly and effective, download our free MySOLEM App on the App Store or on Google Play.

FREE FEATURE

TO DISCOVER IN 2025

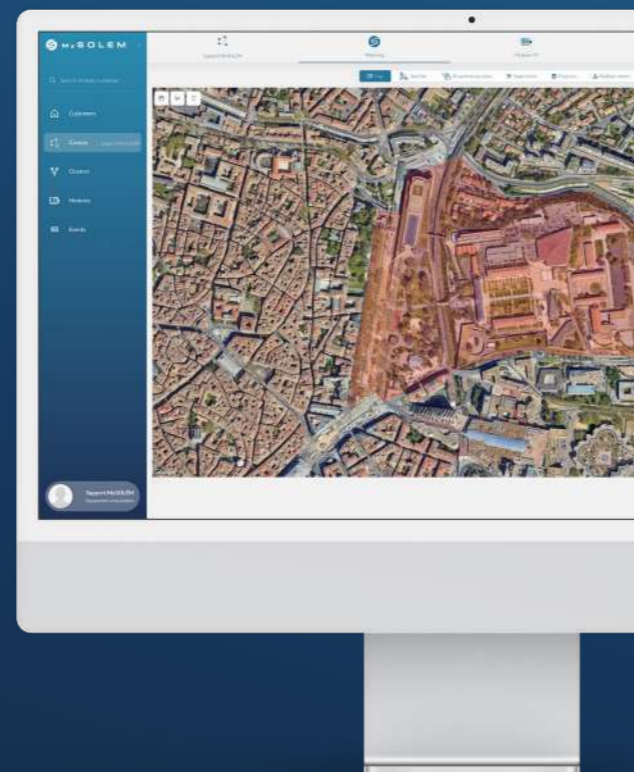

Activate the **Eco Mode** during the winter season to extend the life of your batteries. You can increase it even more by activating it during the watering season too.

PROFESSIONAL ACCOUNT

A PLATFORM MADE FOR PROFESSIONALS

MySOLEM CANOPY, CLUSTER & PRO ACCOUNT are powerful online management features designed to help professionals to easily create groups to monitor their entire system. They can efficiently gather irrigation data and autonomously execute programs following preset rules and criteria.

YOUR LARGE-SCALE IRRIGATION

CANOPY is a feature available on the MySOLEM platform allowing you to manage the connected areas of your city.

DISCOVER
CANOPY!

Sites' Management

- Define and visualize your irrigation sites
- Gain time thanks to bulk orders
- Give the complete or partial access to your maintenance teams
- Geolocate your equipment

DASHBOARD

All your data in the blink of an eye

See at a glance the operating status of you installation thanks to a dedicated dashboard for each of your city sites and check the water consumption by site or as a whole.

SUPERVISION

History & Control

- Access historical data and real-time tracking of your irrigation.
- Monitor the effectiveness of irrigation with graphical representation.
- Verify the compliance of your hydraulic network by associating your valves and sensors.
- Customize your monitoring interface with your own supervision tabs.

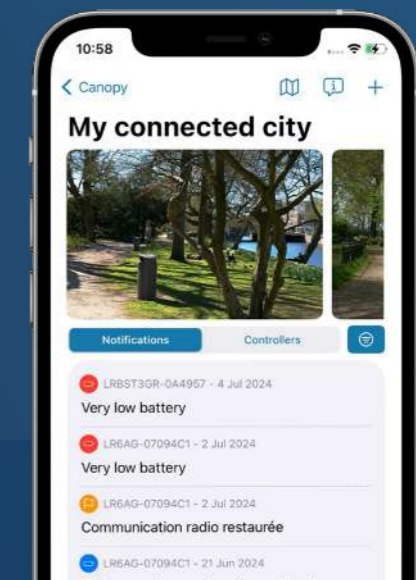

NEW

Mobile CANOPY!

Find your sites on the MySOLEM app and be notified when needed.

DISCOVER
THE APP
VERSION!

A specific app & platform for your city

Customized management of user rights

Transfer your data to the hypervisor of your city using a **dedicated API**

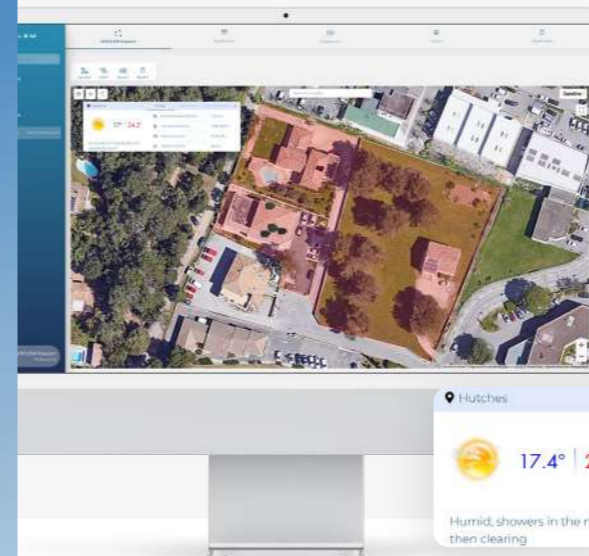

Optimized platform & application for large-scale installation management

Exclusive access reserved for city personnel

MYSOLEM EVOLUTION New features for smart irrigation

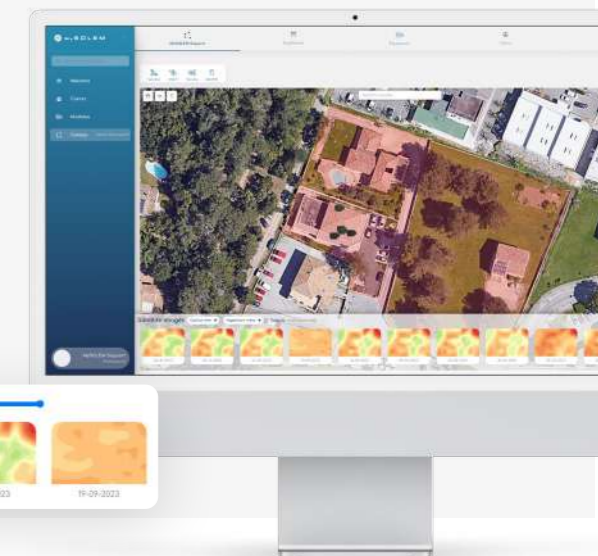

Evapotranspiration & solar radiation

Switch to precision irrigation by taking into account the online weather data of your area.

Hutches		Today	Tomorrow	After tomorrow
☀️	17.4° 23.7°			
	Humid, showers in the morning, then clearing			
☁️	EVAPOTRANSPIRATION		1.5mm	
☀️	SOLAR RADIATION		2116.2 W/m²	
🌬️	MEDIUM WIND		13 km/h	
☔️	PRECIPITATION		0.1mm	

Satellite view

Visualize the impact and evolution of your irrigation. A snapshot is available every 5 days on average.

SOLEM also provides solutions for **sport fields, stadiums, residential green spaces** and **camping grounds**.

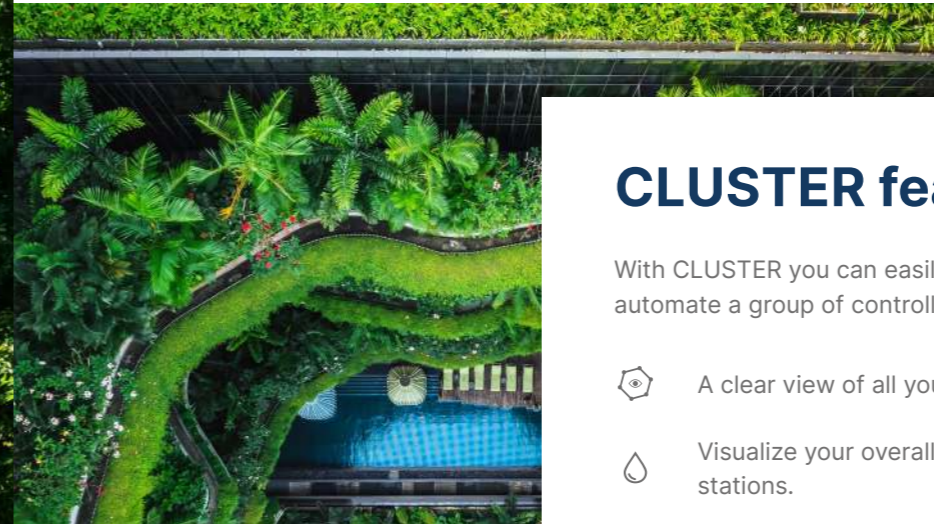

Contact us for further information.

FUNCTIONALITIES

GROUP YOUR STATIONS

View all of your programs on a single board

CLUSTER feature

With CLUSTER you can easily organize, program, and automate a group of controllers associated with a main line :

-  A clear view of all your stations.
-  Visualize your overall daily water usage or individual stations.
-  Prioritize your controllers within the cluster and sequence automatically each programmed lane. Automatic recalculation based on the Water Budget.
-  Automatically synchronize your main valve in order to avoid overpressure risks.
-  Parallel programming of several stations by creating subprograms.

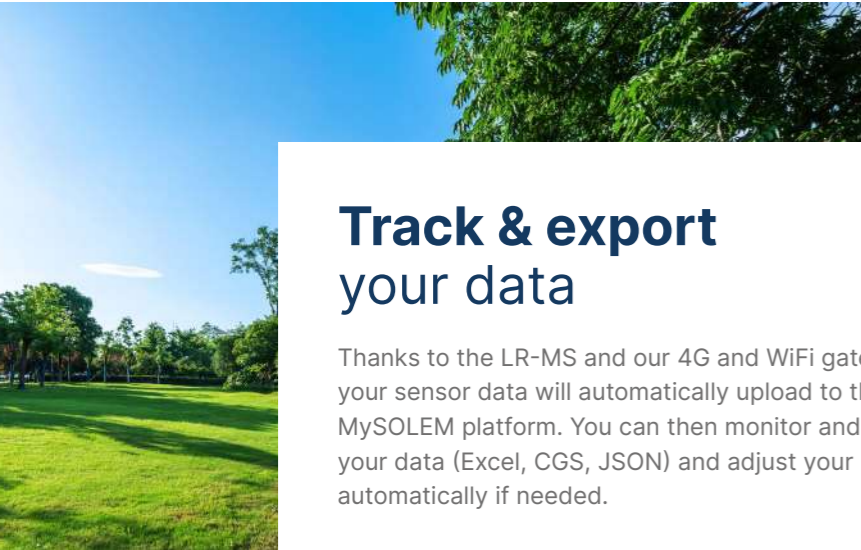

A selection of compatible products

CLUSTER enables to group the following controllers: LR-IP, LR-IS, SMART-IS, VILLA and LR-PM.

MYSOLEM AUTOMATION

Let your sensors control your valves

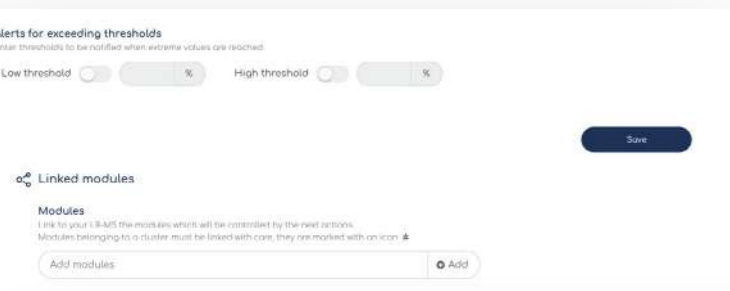

Track & export your data

Thanks to the LR-MS and our 4G and WiFi gateways, your sensor data will automatically upload to the MySOLEM platform. You can then monitor and export your data (Excel, CGS, JSON) and adjust your programs automatically if needed.

Exploit your data to automate your irrigation

By defining min/max thresholds for your sensors, you can automate actions on your controllers via the MySOLEM platform. Irrigate at the right time, with the right volume of water.

Start and stop a main valve or a pump 

Turn on or off all of your modules automatically 

Automatically set your water budget according to the local weather forecast

Optimize your irrigation & save water!

-  Thank to its geolocation, each of your controllers can connect to the local weather forecast via the internet.
-  Define your automatic water budget activation rules (from 0 to 200%) according to rain and drought.
-  Available via the MySOLEM platform, this advanced feature checks the activation of your defined rules according to the weather forecast twice daily at 5 AM and 5 PM.

REMOTE IRRIGATION

SOLEM LORA™ RANGE:
THE SMART SOLUTION
FOR THE ACCURATE IRRIGATION
OF YOUR CITY

CONTROL YOUR IRRIGATION REMOTELY WITH LORA™

AUTOMATE YOUR ENTIRE IRRIGATION SYSTEM WITH SOLEM

0.5 miles radius: 25 modules

Program your irrigation
using your own weather data

Automate the control of your valves
based on your sensors data

Guarantee the proper operation of your valves

Ensure the proper operation of your pump

LR-PR

LR-PR

Filtration

Relay

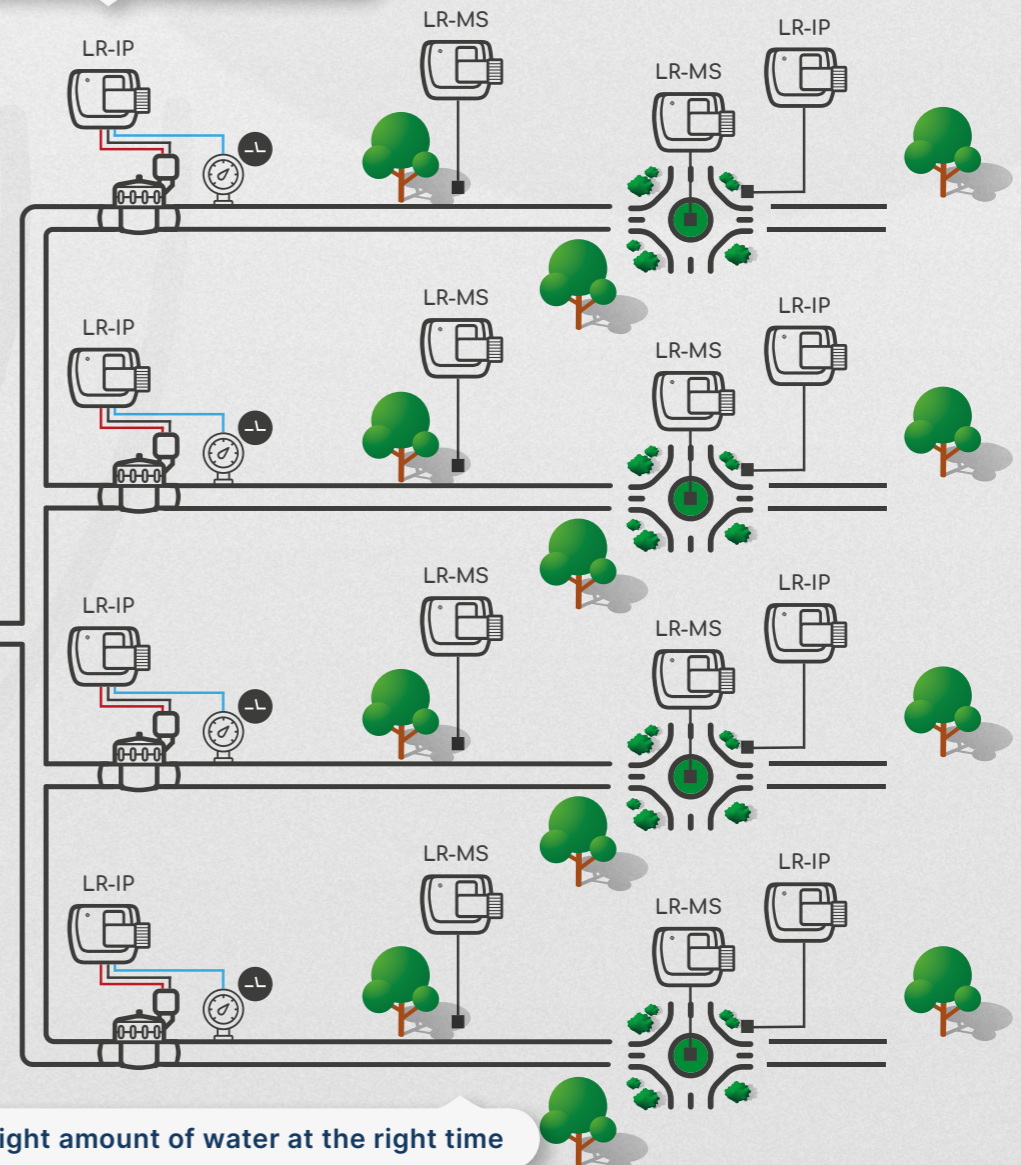

LR-PM

Monitor & register
your water consumption

Be immediately alerted in case of leak

Automatically synchronize the programming
of your master valve with your controllers

Use the right amount of water at the right time

REMOTE IRRIGATION

CONTROL YOUR IRRIGATION SYSTEM REMOTELY FROM ANYWHERE WITH LORA™

Connect your modules using LoRa™ radio technology to create remotely operated installations with reliable and low-energy connectivity. Easily deploy SOLEM controllers in your garden with no extra wiring or power supply required.

LR-MB

Indoor WiFi Gateway

3-year WARRANTY

The LR-MB is an AC-powered indoor gateway that connects through WiFi. It can remotely manage 10 to 30 LoRa™ radio modules, depending on the chosen version. Simply transfer your programming and settings to be alerted in real-time and from anywhere!

Range to module	0.5* miles radius	Connection	WiFi LoRa Bluetooth
Modules	10/30	Control	Remote
Power	120V - 60 Hz		

Features

INDOOR

EXTENDABLE ANTENNA

SCAN TO VIEW SPECIFICATIONS

* Range up to 0.5 miles radius or 1 mile total. It may vary depending on the installation's configuration.

Irrigation Station

4G Gateway, centralizes your sensors, 100% self-sufficient with solar panel

3-year WARRANTY

The irrigation station is a 4G outdoor gateway communicating through its SIM card. It is 100% solar-panel autonomous and pre-equipped with four probes. It is a weather station providing climate and gateway data capable of remotely managing up to 144 stations (24 modules) via LoRa™ radio. Simply transfer your programming and settings to be alerted in real-time from anywhere! You can then group together all your sensor data for visualization.

Range to module	0.5* miles radius	Connection	4G
Modules	up to 24	Installation	Pole provided
Power		Control	Remote

Features

¹ Synchronization with the server every 15 minutes

LR-BST-REACT

4G Gateway to manage your modules remotely

3-year WARRANTY

The LR-BST-REACT is an outdoor 4G gateway communicating through its SIM card, remotely managing up to 25 modules. It is ideal for isolated green spaces without WiFi and/or for spaces without a power supply, given that the station can either be plugged into the mains or fully autonomous when connected directly to a solar panel. Simply transfer your programming and settings to be alerted in real-time from anywhere!

Range to module	0.5* miles radius	Connection	4G
Modules	up to 25	Installation

0.5 MILES*

LR-PM

9V Controller for Master Valve / Pump

3-year WARRANTY

The LR-PM is a battery-powered, waterproof Bluetooth® and LoRa™ watering controller capable of controlling a master valve or a pump. Paired with a WiFi or 4G gateway, it automatically synchronizes the programming of all controllers connected to the same water network (LR-IP and LR-IS compatible). View all your programs at a glance and optimize pump flow according to your valve programming.

Compatibility	DCL 9V  	Power	ECO MODE

LR-IP

9V Irrigation Controller

3-year WARRANTY

The LR-IP is a battery-powered, waterproof Bluetooth® and LoRa™ irrigation controller capable to program 9V solenoid valves sequentially. It is ideal for underground installations: no need to open manholes! It can be remotely controlled from anywhere when paired with a WiFi or 4G gateway. When connected to a water meter, it monitors your water consumption and allows you to receive real-time alerts in the event of under or overflow leaks.

Compatibility	DCL 9V	Power	ECO MODE	
Inputs: 1	or or **	Connection		
Stations	1/2/4/6	Control	Remote	

0.5 MILES* ECO RANGE

LR-IP-ECO KIT

9V Irrigation Controller with Built-in Flowmeter

3-year WARRANTY

The LR-IP-ECO KIT is a battery-powered, waterproof Bluetooth® and LoRa™ watering controller that shares the same features as the LR-IP. It features a flow meter that measures your water consumption, monitors your flow rate and detects the risk of leaks. Finally, the turbine is designed to recharge the module's built-in battery, tripling the life of the 9V battery.

RELAY

Electrical Power Relay

3-year WARRANTY

The RELAY can be used to control any type of electrical device (e.x. pump) from a 9V LoRa™ and Bluetooth® controller. The watering command from the controller opens or closes the RELAY.

Compatibility	Any type of device (up to 230V-16A)	Wire connection	For input and output
Input	1	Max. distance to wire	For input 100 ft

0.5 MILES*

LR-IS

AC Powered Irrigation Controller

3-year WARRANTY

The LR-IS is an AC-powered Bluetooth® and LoRa™ irrigation controller capable to program 24VAC solenoid valves sequentially. It is ideal for indoor installations. Paired with a WiFi or 4G gateway, it can be remotely controlled from anywhere.

Compatibility	24V	Power	120 V - 60 Hz
Inputs: 1	or or	Connection

OPTIMIZE THE IRRIGATION
OF YOUR GREEN SPACES

LR-MS

9V Sensor Module

3-year WARRANTY

The LR-MS is a battery-powered, waterproof LoRa™ sensor data acquisition module. It connects to a wide range of sensors, from weather probes (rain, humidity, anemometry and temperature) to water meters, soil moisture probes, pressure sensors, level sensors and more. Paired with a WiFi or 4G gateway, access your data from anywhere. On the MySOLEM.com platform, view and retrieve your data, and even automate your watering according to your set thresholds for each sensor.

Level Sensor

Measure and track the level of your water tank

The level probe can be used to measure any type of tank. When connected to an LR-MS probe module associated with a gateway, it will provide data feedback and alert you according to the defined parameters.

Monitor the water level of your tanks

Connect a LoRa™ controller to your pump and automate the filling of your tank.

Automate your installation

SCAN TO VIEW SPECIFICATIONS

LR-PR

Connected Pressure Sensor Module

3-year WARRANTY

The LR-PR is a kit composed of a Bluetooth® / LoRa™ acquisition module equipped with a pressure sensor. The kit transmits pressure data **from 0 to 232 psi** to the MySOLEM online platform. Once the thresholds are defined, MySOLEM will alert you in case of overpressure so you can protect your equipment. It can also automatically stop your pump to prevent any leaks or damage to your system.

LONG RANGE IRRIGATION

REMOTELY MANAGE YOUR IRRIGATION SYSTEM FROM ANYWHERE WITH LORAWAN®

Ideal for isolated areas, our LoRaWAN® modules work with a data subscription on the Orange public network and without subscription on private network*: the installation doesn't require any SOLEM gateway.

DISCOVER THE RANGE

Optimize the cost of your installation

CONTROLLER

LR-IP-WAN

9V Irrigation Controller

The LR-IP-WAN is a 9V irrigation controller capable of sequentially programming 9V valves. Connected to your city antenna, remotely control your module via the MySOLEM app and platform.

SENSORS

LR-MS-WAN

9V Sensor Module

The LR-MS-WAN is a sensor data acquisition module. It has 1 to 4 inputs allowing to connect the same sensors as the LR-MS. The data are sent automatically to the MySOLEM platform via the city antenna to automate the start and stop of the irrigation according to the thresholds defined by the user.

*For any private network other than REQUEA, please contact us for a technical study.

REMOTE IRRIGATION

CONTROL YOUR IRRIGATION REMOTELY WITH WIFI

SMART-IS

AC Powered WiFi Indoor Irrigation Controller

3-year WARRANTY

The SMART-IS is an AC-powered indoor Bluetooth® watering controller that connects directly to WiFi. It can program 24VAC solenoid valves sequentially. Connected to a water meter, it enables you to monitor your water consumption and receive real-time alerts in the event of leaks, underflow or overflow.
