Data on root networks/
soil water tension / soil permeability, etc.

 **Urban green spaces**
Roundabouts, thoroughfares, etc.

 **SOLEM 4G gateway**
or LoRaWAN antenna for urban use

 **City stadium**
Easy maintenance & upkeep

 **Parks & gardens**
Upkeep of green spaces

 **Access to
your installations
wherever you are**

**Connected urban irrigation,
easy & scalable**
to meet the challenges facing towns & cities now and in future.

Dedicated platform for your city

Customized
user permissions management

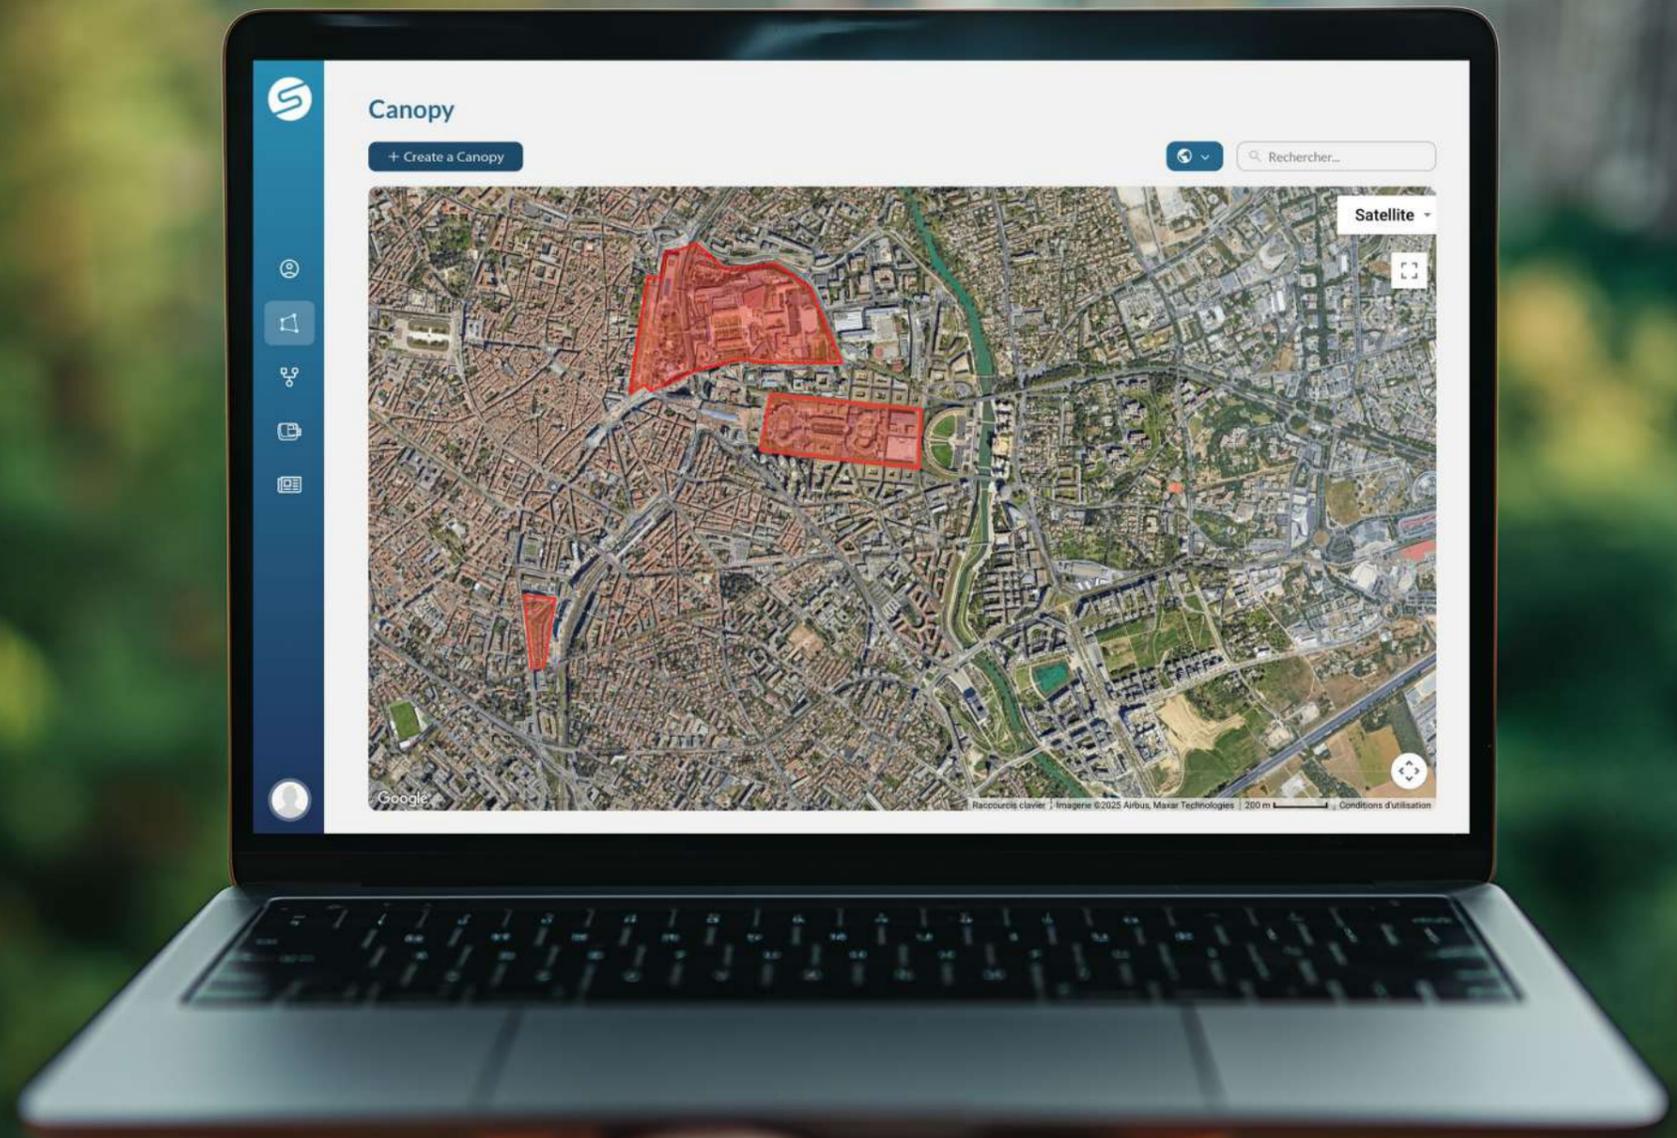

Transfer your data to your town or city's
hypervisor using a **dedicated API**

Platform & application optimised to
manage large-scale installations

Access restricted solely
to municipal staff

MySOLEM Canopy

Large-scale irrigation

- 
Geolocate your watering modules
- 
All your data at a glance via your dashboard
- 
Assess the impact and development of your watering using the satellite view
- 
Give full or partial access to your staff depending on your sites
- 
Real-time monitoring and access to data logs for your watering
- 
Check the effectiveness of your watering via **supervision** of your water system

Mobile Canopy

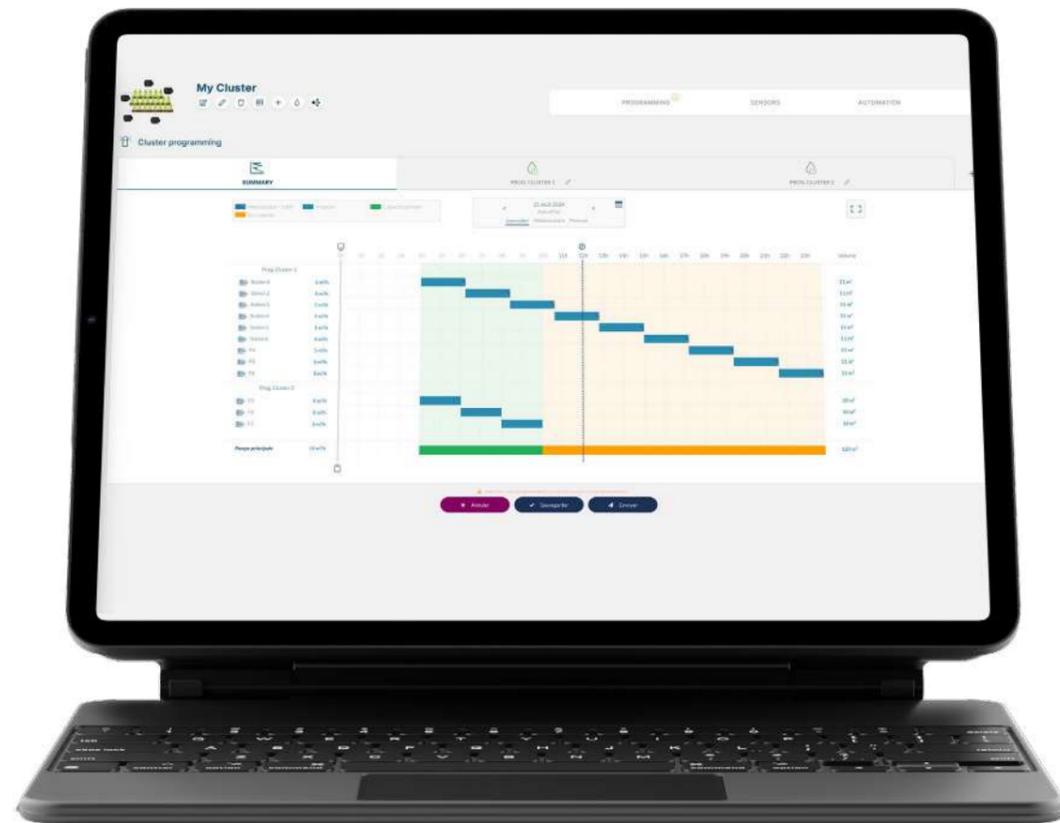

View your sites on the MySOLEM app, and work with your teams quickly and effortlessly.

CANOPY

All Your Schedules In One Click

With MySOLEM Cluster Programming

Schedule an unlimited number of stations in just a few minutes

Optimize your scheduling according to your pump's capacity

Organize and group your stations together quickly

View your theoretical daily water consumption

Automate and secure your water system

MySOLEM Intelligence

Use sensors to automate system actions.

“A simple and effective interface”

NEW

Data security

Keep your modules and schedules secure by means of encrypted Bluetooth communications.

Easy installation

Install your product in a few minutes using close-range set-up: just move the phone nearby, and it's connected.

Eco Mode

Maximise the life of the 9V battery by switching on Eco Mode in winter and during the irrigation season.

LORA™ RANGE

SOLEM LoRa™ Irrigation

Premium, Long Range, Long Life, Remotely

LORA™ RANGE

INSTALLATION IN 3 EASY STEPS

1

Download the free app

Install your products in a few minutes, program your irrigation on site or remotely.

2

Connect your gateway

Install your WiFi or 4G gateway to control your modules remotely.

3

Connect your modules to your gateway

Pair your controllers and sensor modules to your gateway in a few minutes. You're all set.

MANAGE AND AUTOMATE YOUR ENTIRE INSTALLATION REMOTELY

800m*: 25 modules

Program your irrigation using your own weather data

Automate the control of your valves based on your sensors data

Ensure the proper operation of your pump

Monitor & register your water consumption

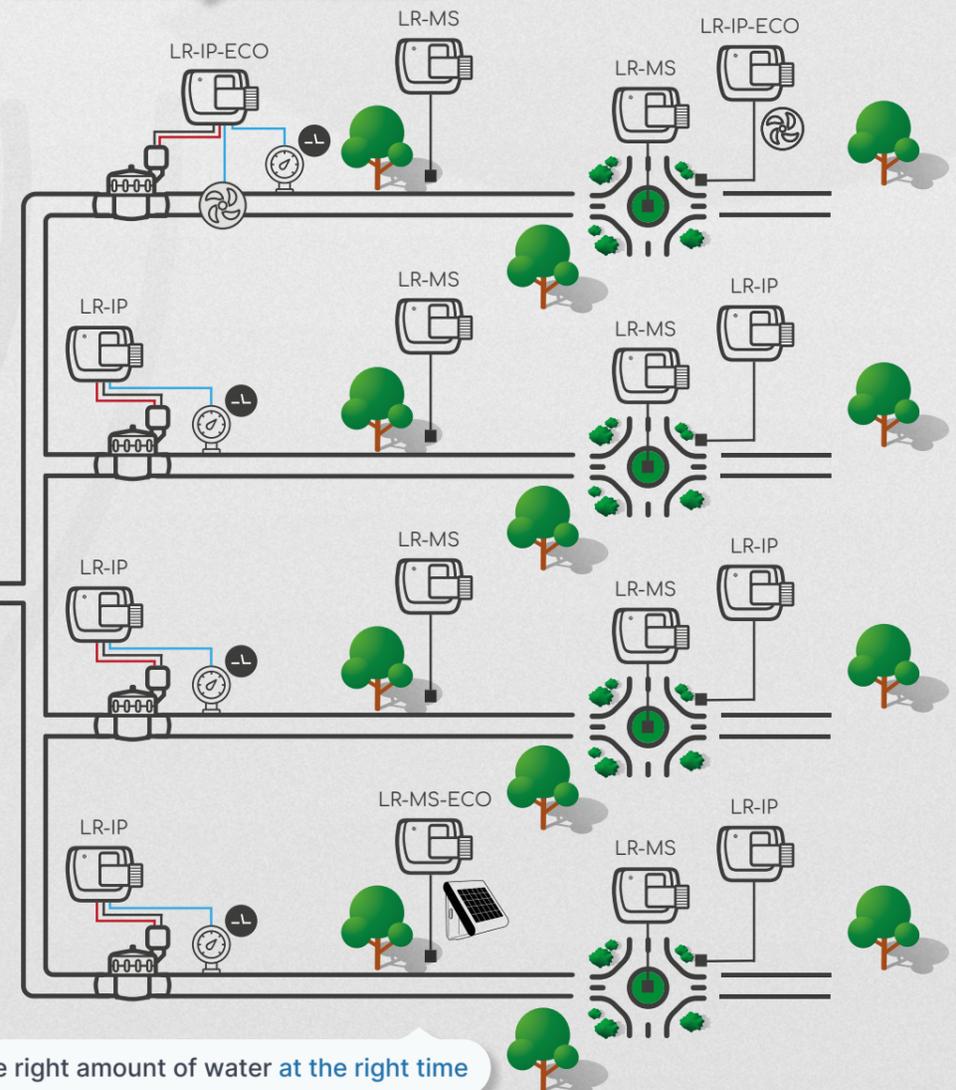

Be immediately alerted in case of leak

Relay 220V

LR-PM

Automatically synchronize the programming of your master valve with your controllers

Guarantee the proper operation of your valves

LR-MB

WiFi Indoor Gateway
Control your modules remotely

The LR-MB is an AC-powered indoor gateway that connects through WiFi. It can remotely manage 10 to 30 LoRa™ radio modules, depending on the chosen version. Simply transfer your programming and settings to be alerted in real-time and from anywhere!

Range to module	800*^m / 875* ^{yds}	Connection	
Modules	10/30	Control	Remote
		Power	120 V - 240V / 50 Hz - 60 Hz

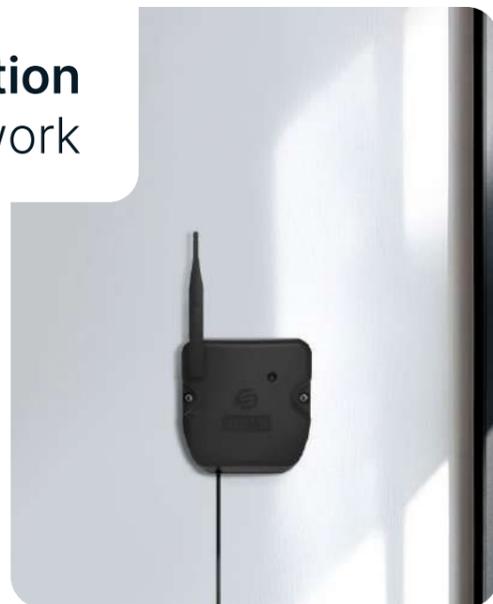

LR-BST-REACT

4G Gateway
Control your modules remotely

The LR-BST-REACT is an outdoor 4G gateway that communicates through its SIM card. It is able to remotely manage up to 25 modules. It is ideal for isolated green spaces with no WiFi. Plugged into the mains or fully self-sufficient when connected directly to a solar panel, it is ideal for spaces that have no power supply. Send your schedules and settings easily, and receive notifications promptly, wherever you are.

Range to module	800*^m / 875* ^{yds}	Connection	
Modules	up to 25	Control	Remote
Installation		Power	

Reliable, free connection
using an existing WiFi network

- Quick & easy to install
- Remote control
- Reliable connection¹
- Extendable antenna

Suitable for spaces
that have no AC power

- Quick & easy to install
- Remote control
- Reliable connection
- Solar power possible
- Real-time connection¹

* Range up to 800m / 875 yds. It may vary depending on the installation's configuration
¹Real-time connection

* Range up to 800m / 875 yds. It may vary depending on the installation's configuration
¹Synchronises with server every 15 minutes

Irrigation Station

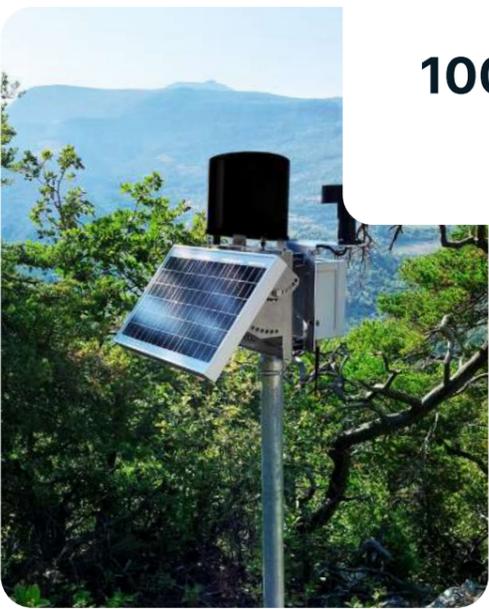

4G Gateway & Weather Station

Control your modules remotely

The irrigation station is an outdoor 4G gateway that communicates through its SIM card. It is entirely powered by its own solar panel, and comes equipped with four sensors. Two-in-one, it is a weather station providing weather data, and a gateway able to remotely manage 288 stations over LoRa™ radio communications. Send your schedules and settings easily, and receive notifications promptly, wherever you are. Lastly, you can collect all the data from your sensors for an at a glance overview.

Range to module	800* m / 875* yds	Connection	4G LoRa Bluetooth
Modules	up to 24	Control	Remote
Installation	Pole provided	Power	

100% Solar powered

- Weather data
- Pre-wired sensors
- Solar power supply
- Real-time connection¹

* Range up to 800m. Range varies depending on the installation configuration.
¹Synchronises with server every 15 minutes

Relay

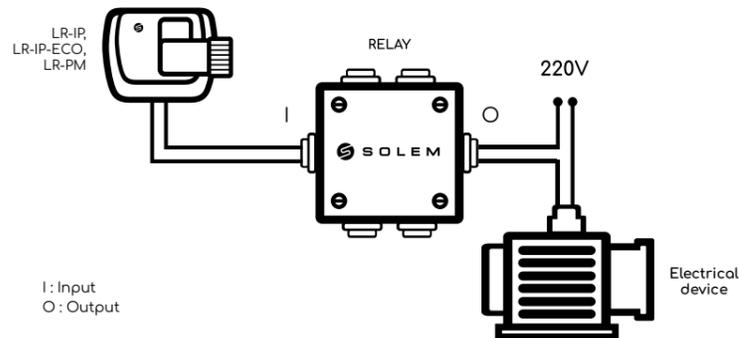

Electrical Power Relay Pump Control Unit

The RELAY can be used to control any type of electrical device (e.x. pump) from a 9V LoRa™ and Bluetooth® controller. The irrigation command from the controller opens or closes the RELAY.

Compatibility	Any type of device (up to 230V-16A)	Wired connection	For input and output 
Input	1	Max. length wired connection	For input 30 m

Controlled remotely!

Controlled remotely by means of a 9V LoRa™ and Bluetooth® controller (itself paired with an LR-MB-30 or LR-BST-REACT access point).

NEW

LR-PM

Module for Master Valve / Pump LoRa™, 9V

The LR-PM is a waterproof, battery-powered Bluetooth® and LoRa™ irrigation controller, able to control a master valve or a pump. Paired with a WiFi or 4G gateway, it automatically synchronizes all irrigation schedules for modules connected to the same water network (LR-IP and LR-IS compatible). View all of your schedules at a glance and optimize the pump flow rate based on the schedules for your valves.

Compatibility		Connection	LoRa Bluetooth
Station	1	Control	Remote 
Input: 1	 or 	Power	 9V

Keep your water system secure

-  Waterproof (IP68)
-  Manage your water consumption
-  Pump on-off control

-  Cluster p.10
-  Supervision p.9
-  Eco Mode p.13

LR-IS

Irrigation Controller LoRa™, AC-Powered

The LR-IS is an AC-powered Bluetooth® and LoRa™ irrigation controller capable to program 24V AC solenoid valves sequentially. It is ideal for indoor installations. Paired with a WiFi or 4G gateway, it can be remotely controlled from anywhere.

Compatibility		Connection	
Stations	2/4/6/9/12	Control	Remote 
Input: 1	 or  or 	Power	120 V - 240V / 50 Hz - 60 Hz 

Ideal for mains-powered installations

-  Weather-based
-  Control over water consumption
-  Check the valve's status

-  ^{p.10} Cluster
-  ^{p.9} Supervision
-  Auto. Waterbudget

Range up to 800m. Range varies depending on the installation configuration.

OF AUTONOMY

NEW
LR-IP

Irrigation Controller
LoRa™, 9V

The LR-IP is a waterproof, battery-powered Bluetooth® and LoRa™ irrigation controller, able to sequentially schedule 9V solenoid valves. It is ideal for use with under-soil installations: open your manholes less often! Paired with a WiFi or 4G gateway, it can be operated remotely from wherever you are. Linked to a water meter, it will monitor your water consumption, and send real-time notifications in the event of leaks or under- or over-flow.

Compatibility		Connection	LoRa™ Bluetooth® NFC
Stations	1/2/4/6	Control	Remote
Input: 1	or or	Power

- Control over water consumption
- Pressure detection

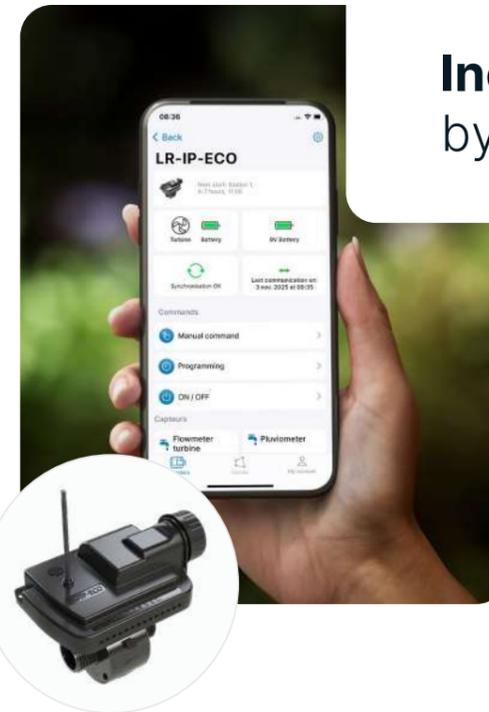

LR-IP-ECO

Irrigation Controller
LoRa™, 9V - turbine or solar panel

The LR-IP-ECO is a waterproof, battery-powered Bluetooth® and LoRa™ irrigation controller, with the same features as the LR-IP. It has a built-in flow meter that measures your water consumption, checks your flow, and identifies leak risks. The turbine or solar panel recharge the module's built-in battery, tripling the lifespan of the 9V battery.

Compatibility		Connection	LoRa™ Bluetooth®
Stations	1/2/4/6	Control	Remote
Input: 1	or or	Power	or +

Increase its battery life
by using renewable energy

- Rechargeable battery
- Compact solution
- Flexible installation **turbine or solar panel**
- Weather-based
- Control over water consumption
- Pressure detection

Connect All Your Sensors

Optimize the irrigation of your green spaces.

LR-PR

Connected Pressure Sensor

The LR-PR is a kit composed of a Bluetooth® / LoRa™ acquisition module equipped with a pressure sensor. The kit transmits pressure data **from 0 to 16 bars** to the MySOLEM online platform or app, allowing you to monitor the pressure of your installation. . Once the thresholds are defined, MySOLEM will alert you in case of overpressure so you can protect your equipment. It can also automatically stop your pump to prevent any leaks or damage to your system.

Compatibility	Pressure sensor	Connection	LoRa Bluetooth
Input	1	Control	Remote
		Power	

Keeping your water system secure

- Pressure control
- Configurable notification thresholds
- Data extraction options

p.9
Supervision

p.13
Eco Mode

* The warranty only covers the casing

Pressure Switch

Pressure Detector

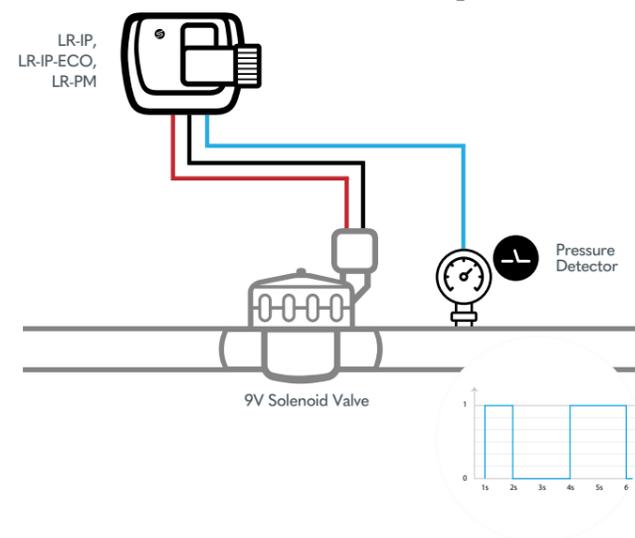

The pressure switch guarantees the proper functioning of your solenoid valves depending on the programming of your controllers. It is also helpful when analyzing technical problems in the hydraulic network. Receive an alert on your mobile phone or by e-mail in case of anomaly. It also helps save time analysing technical issues affecting the water system.

Compatible with

Wire connection

- LR-MS
- LR-IP
- LR-IS
- LR-PM
- LR-MS-ECO
- LR-IP-ECO
- SMART IS
- VILLA

Check that valves are operating correctly

- Check the valve's status
- Notifications in the event of issues

LR-MS

Sensor Module
LoRa™, 9V

The LR-MS is a waterproof, battery-powered, sensor data acquisition module. This module can connect to many types of sensor, including weather sensors (rain, air humidity, wind speed and temperature), water meters, soil moisture sensors, soil tensiometers, various level detectors, and more. Paired with a Wi-Fi or 4G gateway, you can access your data from wherever you are. You can view and extract your data from the MySOLEM.com platform, and even automate your irrigation based on thresholds that you set for each sensor.

Compatibility		Connection

LIGHTING & AUTOMATION FOR YOUR CITY

LIGHTING & AUTOMATION

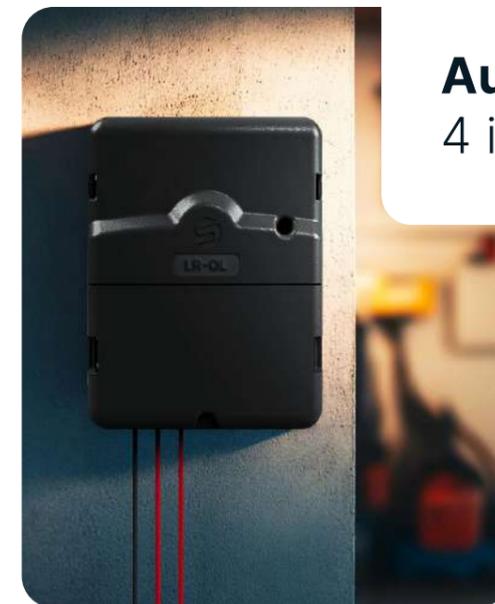

LR-OL

Lighting & Electrical Controller LoRa™, AC Powered

The LR-OL is a battery-powered Bluetooth® and LoRa™ relay module capable of programming up to 4 distinct lighting and garden automation zones: garden lighting, pump, fountain lighting, and more. Paired with a WiFi or 4G gateway, it can be controlled remotely from anywhere.

Compatibility		Connection	
Lines	4	Control	Remote
		Power	120 V - 240V / 50 Hz - 60 Hz

Automate up to 4 independent areas

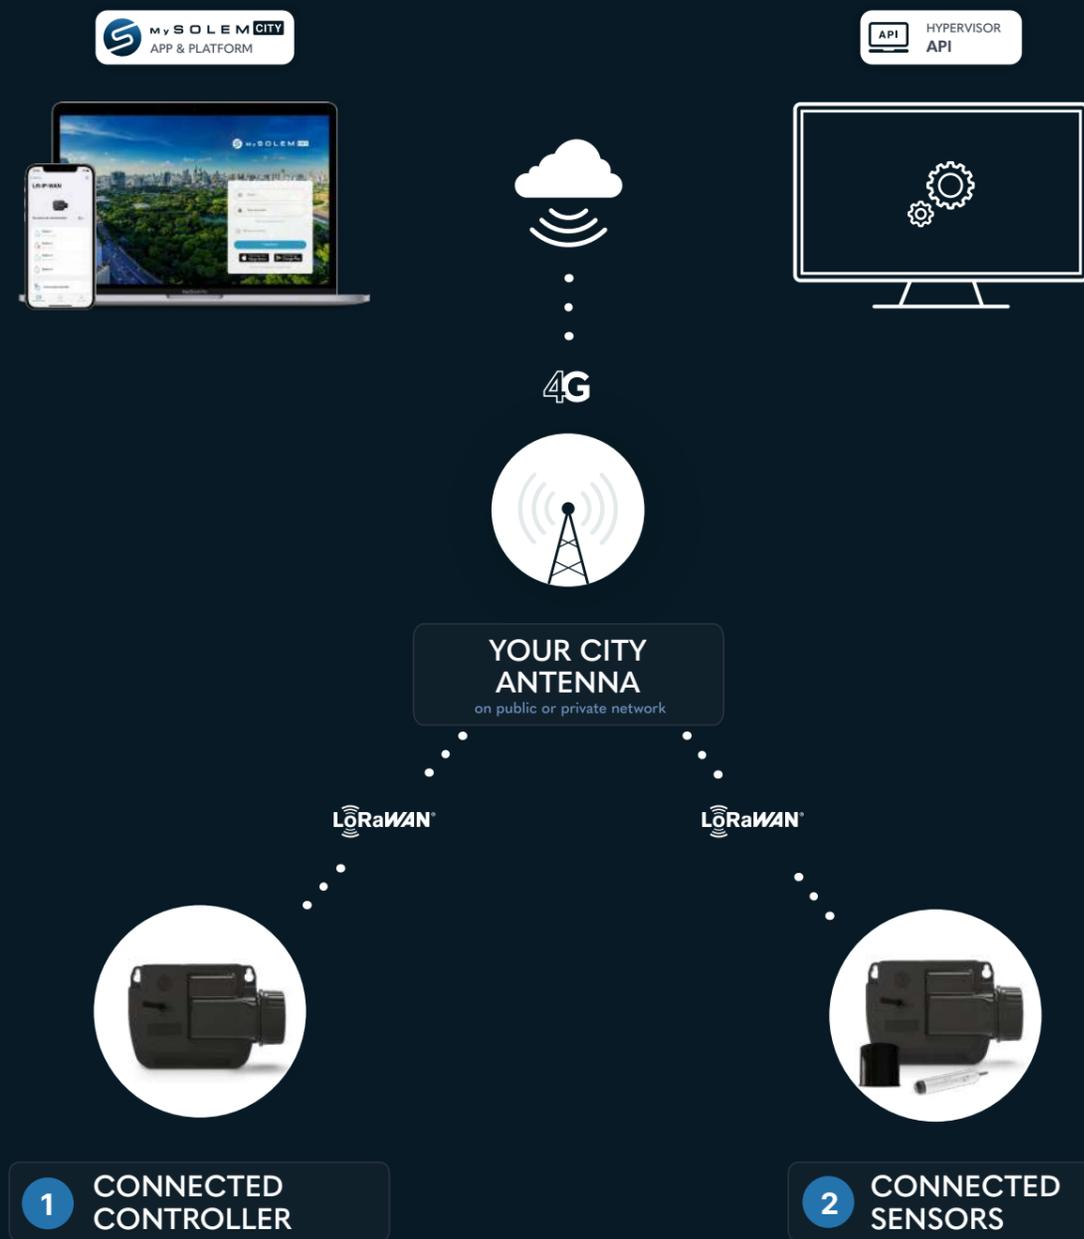

- Energy savings
- Multipurpose device
- Garden ambience builder

DOCUMENTS

SOLEM LoRaWAN™ Irrigation

Ideal for isolated areas, our LoRaWAN® modules work with a data subscription on the public network and without subscription on private network: the installation doesn't require any SOLEM gateway.

LR-IP-WAN

Irrigation Controller
LoRaWAN™, 9V

The LR-IP-WAN is a 9V irrigation controller capable of sequentially programming 9V valves. Connected to your city antenna, remotely control your module via the MySOLEM app and platform.

Compatibility		Connection	LoRaWAN® Bluetooth®
Stations	1/2/4	Control	Remote
Input: 1		Power	

LR-MS-WAN

Sensor Module
LoRaWAN™, 9V

The LR-MS-WAN is a sensor data acquisition module. It has 1 to 4 inputs allowing to connect the same sensors as the LR-MS. The data are sent automatically to the MySOLEM platform via the city antenna to automate the start and stop of the irrigation according to the thresholds defined by the user.

WIFI RANGE

SMART-IS

Indoor Irrigation Controller

WiFi, AC-Powered

The SMART-IS is an AC-powered indoor Bluetooth® irrigation controller that connects directly to WiFi. It can program 24V AC solenoid valves sequentially. Connected to a water meter, it enables you to monitor your water consumption and receive real-time alerts in the event of leaks, underflow or overflow.

Compatibility		Connection	 Bluetooth®  WiFi
Stations	2/4/6/9/12	Control	Remote   
Input: 1	 or  or 	Power	120 V - 240V / 50 Hz - 60 Hz 

VILLA

Outdoor Irrigation Controller

WiFi, AC-Powered

The VILLA is an AC-powered indoor Bluetooth® irrigation controller that connects directly to WiFi. It features a large display and buttons for easy use. It can program 24V AC solenoid valves sequentially. Connected to a water meter, it enables you to monitor your water consumption and receive real-time alerts in the event of leaks, underflow or overflow. The WAGO-type connectors make it easy to install.

- Control over water consumption
- Leak detection

- Asynchronous Mode
- Monthly Waterbudget
- Eco Mode p.13

*10m range. Range varies depending on the installation configuration.

High-quality products & services

SOLEM is committed to providing secure and effective services.

Application & platform

Free of charge, available 24/7* for remote management of all SOLEM products.

Scalable system

Capacity to support an unlimited number of products.

Data protection

Our servers are hosted in France and managed by SOLEM.

Data backup

Backups every 6 hours to limit the risk of data loss.

Technical support

Our experts are ready to listen to your needs and advise you about your irrigation plans.

Three-year warranty

All SOLEM products (excluding accessories and spare parts) are guaranteed for 3 years.
