

BL-IS

Bluetooth® Irrigation Controller, AC Powered

The BL-IS is a Bluetooth® indoor irrigation controller that plugs into a standard outlet and can sequentially program 24V solenoid valves. It is ideal for indoor installations. Pair your BL-IS with a rain sensor to automatically stop your irrigation based on weather conditions.

INSTALLATION

External power supply (220/24V)
Electrical terminal block
24VAC solenoid valve connection
Master valve connection / pump start relay
Rain sensor connection
Operating temperature: 0°C à 50°C

OPERATION

Power supply: 220–240V / 50–60Hz
Max. current: 0.75 A (18 VA)
Bluetooth® Smart 4.0 Low Energy
Permanent backup of the programming
Backing up the internal clock in the event of power outage < 5 hours

DIMENSIONS

2/4/6 stations:
11 × 14.5 × 3.6 cm (WxHxD)
9 stations:
16 × 14.5 × 3.6 cm (WxHxD)

Compatibility

Product Geolocation

Record the geographic location of your programmer on MySOLEM.

Open your technical room less often

Control your BL-IS via Bluetooth® from a distance of up to 10 meters or from above the valve chamber using the MySOLEM app.

Easy To Use

Optimize your watering by choosing between two scheduling options: by station or by program.

MySOLEM Asynchronous Mode

With asynchronous mode, you can schedule your tasks on your computer via MySOLEM.com and transfer it to your controller using the MySOLEM app via Bluetooth.

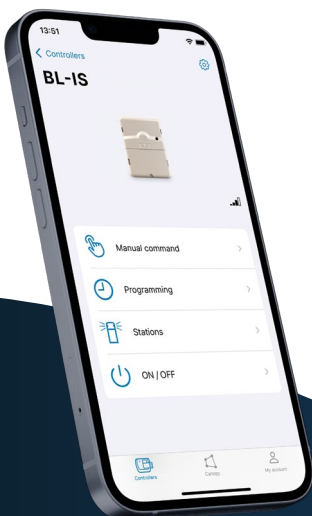

Rain Detection

Connect a rain sensor and set your sprinkler system to turn off automatically based on the weather.

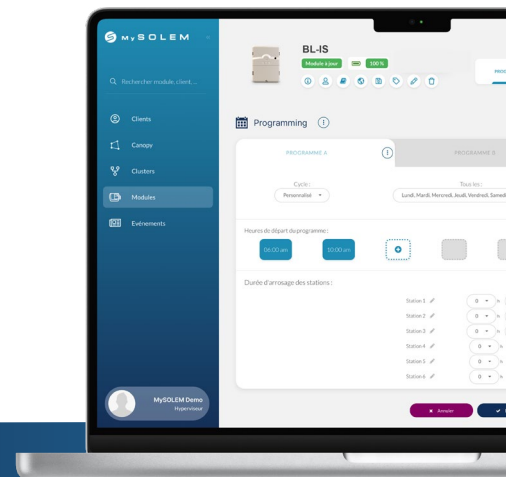

Compatible with existing installations

In place of an existing controller, to take advantage of our connected solutions.

Install. Program. It's ready.
